Northwood, N. H., February 15, 1919.

Report of Superintendent of Schools

To the School Board and Citizens of Northwood:

I present below for your consideration my third annual report as superintendent of your public schools.

During the school year ending on July 15, 1918, the last complete school year, the schools were maintained for a total of 245 weeks and during this time the superintendent made 127 visits to these schools. At these visits all classes were examined, in at least a portion of their subjects, and the general discipline and order of the room noted. Also from time to time during the year the superintendent has given written tests covering the main points in the program of studies. As a result of these visits and tests, the superintendent believes that the essential subjects of the common school curriculum are being as well and thoroughly taught in Northwood as in many larger places and much better than in some of our surrounding towns. The increase in length of school year has helped materially in the doing of more and better work by the pupils. The State Program being made for a school year of 35 or 36 weeks, it is rather difficult sometimes to attempt to oblige pupils to do the work in a shorter school year.

As stated above the essential subjects in the elementary course are being well taught. There are other subjects in the course to which Northwood has not as yet given much heed, viz: manual training, domestic arts, French in the grades, music, etc. Although some work in school singing is now being carried by the individual teachers.

These additional courses might well be introduced. It is more or less a question of finances. All these additions

to the school program will require an increase in the appropriation. The present state of abnormal prices makes it an almost inopportune time for the enlargement of the school program. However, it is to be hoped that in the near future some provision may again be made for employing a special music teacher as has been done in the past. An arrangement can now be made whereby the expense of this innovation would be small.

There is ample space in both the larger school buildings of the town to provide room for manual training and domestic arts, especially in the school building at the Ridge. The primary room in this building is easily of sufficient floor area to provide rooms for both primary and intermediate classes, if a partition was placed through the center of the room and a few more windows installed. This arrangement would not only give available room for work in the special subjects of the State Program but would soon save cost of making the change in a lessened expense for fuel. It is to be hoped that during the coming year this change may be accomplished.

At the close of the Spring term in June eleven pupils were passed from the eighth grade. Eight of these pupils are now with success continuing their studies at Coe's Academy.

Respectfully submitted,

W. S. ADAMS.
